

EUROGIA2020 : The EUROGIA+ Programme continues its growth

Ankara, TR – June 19th, 2013 – EUROGIA+, the EUREKA cluster for low carbon energy technologies, is delighted to announce that its mandate as a EUREKA Cluster has been renewed today by the EUREKA member countries.

The mandate renewal application was approved today in Ankara at a meeting organized by the EUREKA Turkish chair. EUROGIA+ will continue its activities under the name of EUROGIA2020 for the next 7 years. Following the presentation of EUROGIA+ General Manager Gabriel Marquette, 18 EUREKA Countries declared their full support for the continuation of the programme.

‘We want EUROGIA2020 to be the real full energy mix program, without any restriction, but with the fundamental principle to produce and consume energy respectfully of the environment. During the new mandate, additional focus areas including ubiquitous storage, minerals availability, CO2 valorization, H2 production and also waste management will be tackled’ said Gabriel Marquette.

EUROGIA2020 intends to lead the revolution of the energy transition.

More about EUROGIA+ :

EUROGIA+, the EUREKA Cluster for low carbon energy technologies, supports the development of innovative low carbon energy technologies, covering the full energy mix.
