EUREKA

innovation across borders

Supporting innovative, industry-driven, pre-competitive R&D projects in the area of Software-intensive Systems & Services (SiSS).

Research projects in the area of telecommunications, new media, future Internet, and applications & services focusing on a new "Smart Connected World" paradigm.

EUROGIA2020 aims to support and promote transnational, low carbon energy technology projects

Catalyses the generation of innovative, industry-driven, pre-competitive R&D projects in the area of Smart Electronic Systems.

Has the goal to develop a complete ecosystem around the semiconductor industry.

The focus of its projects is increasing productivity and reducing time to market.

Aims at generating wealth, growth and well-being in Europe, by securing global leadership in industrial metallurgy and advanced manufacturing across a broad range of market sectors.

It is a market and industry driven initiative, joined by more than 26 countries and 100 companies across Europe and beyond. The main objective is to promote transnational collaboration for developing innovative projects in water technologies.
